FITTING NOTES

Measure as Fitting Guide on website. Match to closest foot length or compare to Birkenstock size.
Please note our sizes are designed to be firmer fitting than how Birkenstock suggest theirs to fit (theirs are suggested with bigger gaps around straps and behind heel)
If you wear a size that doesn't exactly align with a Birkenstock size on our chart (ie: like a 46), then choose the half size which best suits you.
For example, if you wear a 46 in a Birkenstock and find it firm then a 12 would suit you best.
If you wear a 46 and find it slightly loose, then a 11.5 would suit you best. The same can be applied to a size 41 (either a 7.5 for a smaller foot or 8 for a larger foot).
Generally speaking, this style of last fits larger than a normal dress shoe Euro size. So don't translate a standard Euro dress shoe size to a Birkenstock size.
Typically someone who wears a 40 dress shoe will be a 39 in their Birkenstock size (which would be our 6.5).
